

GDOR-SLAM: guarded tracking support without persistent dynamic writes

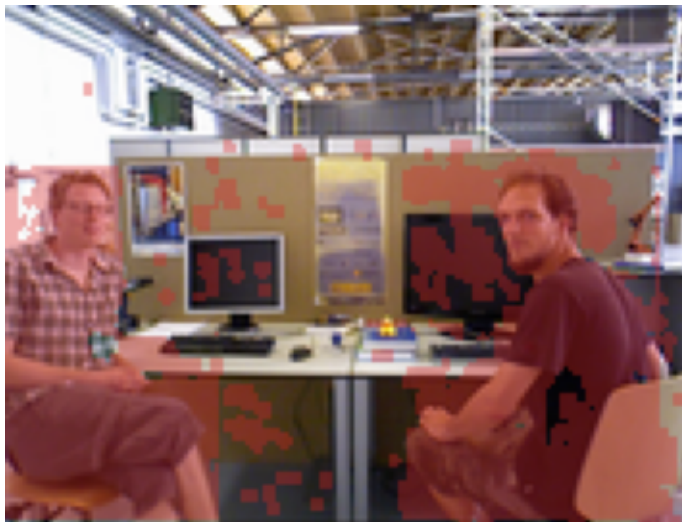

Dynamic occlusion

Partial background exposure

Large masked region

Frozen DYN-18 TUM4 validation: three seeds, full sequences

Evidence summary

DYN-15 All7 (63 runs)
11.331 -> 3.798 cm (-66.5%)

DYN-18 frozen TUM4 (36 cells)
9.746 -> 3.415 cm (-65.0%)

DYN-17 matched persistent weight
Semantic 20.568 | matched 7.816
GDOR 4.053 cm (48.1% below matched)

Recovered observations may support tracking,
but never bypass persistent Gaussian admission.
